Project Features

The Miramar College Performing Arts Center and English and Gallery Building Project will add approximately 64,000 ASF of new construction, including site preparation, utilities, and extensive exterior improvements such as landscaping, accessible pathways, and signage. This new facility will support academic programs currently lacking dedicated space, particularly within the Humanities, and will replace an aging lecture hall with modern classrooms, writing labs, multimedia studios, editing suites, and a public gallery. The project also includes a stagecraft, multimedia, and performance venue featuring a large lecture hall, advanced AV systems, and flexible event space for both academic and community use. Located along Black Mountain Road, the building will serve as a welcoming gateway to campus and a cultural asset for the surrounding community. Demolition of the southeast portion of Lot 2 is also included in the scope.
